

ENVIRONMENTAL IMPACT ASSESSMENT

Phlorum co-ordinates EIAs and Strategic Environmental Assessments (SEA) providing a dedicated, client-centred service. The EIA process often involves the consideration of a wide variety of topics and identifies and assesses the key impacts in any specific study area.

We provide services in the following areas:

- Management of the consultation process
- Production of screening and scoping reports
- Environmental surveys
- Monitoring and production of baseline assessments
- Environmental modelling and assessment of impacts
- Environmental Reports (ER) & Environmental Statements (ES)
- Provision of expert witnesses

Phlorum has considerable experience in undertaking both EIA and non-statutory EIA (where the planning authority does not consider that a full EIA is required under regulations). Our approach to EIA/SEA is to listen carefully to the needs of our clients and to provide the dedicated service required.

In addition to the services listed above, we can provide:

- a technical component, where we slot in with existing EIA/SEA teams to produce specialist sections of the ES or ER
- a complete co-ordination and management of the EIA/SEA where we will manage the whole project from consultations, screening, scoping, production of the ES/ER and, if required, provision of expert witnesses.

OTHER SERVICES INCLUDE

- Air quality
- Noise and vibration
- Contaminated land
- Flood risk
- Ecology
