

ENVIRONMENTAL SERVICES FOR CONSTRUCTION

Phlorum is an environmental consultancy providing specialist environmental management services for development sites during demolition and construction activities. Our services to the construction industry include:

- Ecology surveys, watching briefs
- Construction Environmental Management Plans
- Waste management
- Air quality monitoring
- Noise/vibration monitoring

By assessing the specific environmental sensitivities and impacts of each project and evaluating both the client requirements and any planning conditions, Phlorum provides a project-specific package to ease the development process, outlining some or all of the following:

- The development and installation of Construction Environmental Management Plans (CEMP) or Environmental Management Systems (EMS)
- Carrying out environmental monitoring (dust, noise, vibration, contamination, groundwater etc.) and/or auditing
- Providing environmental induction and awareness training for site staff
- Applying for waste management licenses
- Seconding environmental managers on a full-time, part-time or call-out basis
- Providing ecological watching briefs for the groundworks
